

I strongly support the continuance of KLOVE radio without any power changes or differences. The positive and uplifting music heard each day is a far cry from what is heard on the alternative stations. I find peace and unity in that I know there are millions all over the world listening to the same music at the same time. We all have one interest in common - Christianity and spreading the word of the Lord. Without KLOVE I would most probably not listen to any radio station. I am fortunate to have a CD player in my car and at work so I would continue to listen to Christian music but I would be doing so by myself. The unity I feel with all the others listening cannot be described. The youth of this land would not have a decent choice of music other than the alternative and secular. Our youth are our future and we must cultivate them appropriately. Sharing the word of the Lord is a big accomplishment and without KLOVE this will not be a success. The public needs to continue to have the opportunity to choose its listening music.
